- Focusable Beam with External Control
- Lightweight Aluminum Housing & Bulkheads
- Head Connection Cables
- Auto-Strike Ignition
- Safety Shut Down System
- 220V Single Phase Magnetic Ballast
- Weather Resistant Ballast Enclosure
- Custom Versions Available

The **Silverbeam 2K Xenon Searchlight System** is a high intensity searchlight designed for Correctional and Homeland Security applications, where critical security is required. When critical maximum beam power is called for, the PSL-14/2K delivers 13,700 footcandles at 100 feet. With its swift ease of motion, the pan and tilt yoke mount combined with the external focus adjustment knob allows the operator to spot or flood its target within seconds. Specifically designed for year round outdoor use, its weather tight lamp house is constructed of rust proof aluminum and powder coated to withstand the severest of outdoor conditions. Manufactured with space age technology throughout, this Silverbeam System can be expected to operate with outstanding efficiency over the course of its lifetime making it the ideal luminaire for those critical security applications.
